

The Windows-based STINGA product family covers a wide range of stand-alone protocol analyser and simulator products. Both notebook- and desktop-based solutions are available. Protocol stacks like SS7oTDM (E1/T1/J1), SS7oIP, SIP, SIP-T, SIGTRAN, BICC, V5.1/V5.2, ISDN PRA, ISDN BRA, DPNSS/DASS2, Megaco/H.248, MGCP and PNNI are supported.

The STINGA SIP Simulator product is a protocol simulator/tester for SIP simulation in IP networks.

This product is suitable for SIP User Agent Client (UAC) and SIP User Agent Server (UAS) simulation, error tracking, conformance testing, load testing/call generation and more.

FEATURES

- SIP and SDP protocol simulation at Ethernet interfaces
- SIP User Agent Client (UAC) simulation
- SIP User Agent Server (UAS) simulation
- Script-based testing
- Script and Message Builder
- Automatic response to incoming messages
- Voice input/output through PC microphone/speakers
- G.711 codec
- RTP DTMF support
- Running on Windows Vista/XP/2003 Server/2000/NT 4.0

SPECIFICATIONS

- Ethernet interfaces
- Ethernet
- IP
- TCP/UDP
- SIP (RFC 3261 and extensions)
- SDP

SOFTWARE & HARDWARE

20705: STINGA SIP Simulator

20170: HASP USB HL Max USB key

Requires WinPcap Packet Capture Library version 3.1 or later.
